EXPERIENCES

Software Developer   **Feb 2020 – Sep 2020**
Ethernom Inc.

Developed and maintained desktop applications (Windows, Mac and Browser Extension) to support Ethernom's Beam U smart card using Qt Creator and ReactJS.

Built and released software via AppStore, PlayStore, and Browser Extension's Stores.

Maintained and implemented bug fixes for mobile applications (Android and iOS) using React-Native.

Software Developer   **May 2018 – July 2019**
UGA - Dr. Adam's Lab (Biochemistry & Molecular Biology)

Developed an automated data processing add-in for trace metal analysis in spreadsheets using Visual Studio and C#.

Created a data transformation pipeline and user interface for the software to be distributed in the laboratory.

Application Developer   **Aug 2018 – Dec 2018**
UGA - New Media Institute

Worked as a team and successfully developed an iOS application for State Botanical Garden of Georgia using Swift and XCode.
